

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended): An impregnated ~~Impregnated~~ paper with a high penetration resistance to fats and oils, wherein said paper ~~characterised in that it~~ is produced from strongly beaten pulps with a degree of beating of 15 °SR to 90 °SR, internal sized with alkenyl succinic anhydride and/or alkyl ketene dimers (AKD) and/or resin sizes and treated with an impregnating liquor which contains a binder system of 80 to 100 parts by mass of water-soluble binders and 20 to 0 parts by mass of water-insoluble polymers in dispersion.
2. (Currently Amended): A paper ~~Paper~~ according to claim 1, wherein said paper ~~characterised in that it~~ contains 0.05 to 0.3 mass percent of alkenyl succinic anhydride for internal sizing.
3. (Currently Amended): A paper ~~Paper~~ according to claim 1, wherein ~~or 2~~ ~~characterised in that~~ the polymers in dispersion are selected from the group comprising polyacrylonitriles, polyacrylates, polyvinyl acetates and polystyrene-polyacrylate copolymers.
4. (Currently Amended): A paper ~~Paper~~ according to claim 1, wherein ~~to 3~~ ~~characterised in that~~ the water-soluble binders are selected from the group comprising polyvinyl alcohols, ethylene-vinyl alcohol copolymers, acetalised ethylene-vinyl alcohol copolymers, acetalised polyvinyl alcohols, polyvinyl butyrals, cationically modified polyvinyl alcohols containing silanol groups, acetalised cationically modified polyvinyl alcohols containing acetalised silanol groups, polyvinyl alcohols containing carboxyl groups, gelatin, galactomannans, alginates, carboxymethylcellulose and starches, including mixtures thereof.
5. (Currently Amended): A paper ~~Paper~~ according to claim 4, wherein ~~characterised in that~~ the water-soluble binders comprise polyvinyl alcohol and gelatin.

6. (Currently Amended): A paper ~~Paper~~ according to claim 5, wherein ~~characterised in that~~ the gelatin has a surface tension of less than 42 mN/m measured as an 0.1 percent solution at 24°C.

7. (Currently Amended): A paper ~~Paper~~ according to claim 5, wherein and 6 ~~characterised in that~~ the water-soluble binders additionally comprise at least one polyvinyl alcohol containing carboxyl groups and/or at least one compound from the group of ethylene-vinyl alcohol copolymer, acetalised ethylene-vinyl alcohol copolymer, acetalised polyvinyl alcohol, cationically modified polyvinyl alcohols containing silanol groups, polyvinyl alcohols containing acetalised silanol groups and acetalised carboxyl groups, acetalised cationically modified polyvinyl alcohols and/or polyvinyl butyral.

8. (Currently Amended): A paper ~~Paper~~ according to claim 4, wherein one of claims 4 to 7 ~~characterised in that~~ the polyvinyl alcohol is a mixture of at least two types at least one of which exhibits a viscosity of more than and at least a viscosity of less than 35 mPa.s.

9. (Currently Amended): A paper ~~Paper~~ according to claim 1, wherein one of the preceding claims ~~characterised in that~~ the impregnating liquor contains a crosslinking agent.

10. (Currently Amended): A paper ~~Paper~~ according to claim 9, wherein ~~characterised in that~~ the crosslinking agent is glyoxal.

11. (Currently Amended): A paper ~~Paper~~ according to claim 1, wherein one of the preceding claims ~~characterised in that~~ the application weight of the impregnating liquor, calculated as dry substance, is 0.3 to 1.5 g/m² per side.

12. (Currently Amended): A process ~~Process~~ for the production of a paper comprising: ~~the steps~~

- ~~producing production of~~ a raw paper of pulp, mechanical wood pulp or recycled waste paper with a degree of beating of 15 SR to 90 SR with internal sizing with alkenyl succinic anhydride and/or alkyl ketene dimers (ATD) and/or resin sizes, and
- impregnating this paper with an impregnating liquor containing a binder system of 80 to 100 parts by mass of water-soluble binders and 20 to 0 parts by mass of water-insoluble polymers in dispersion.

13. (Currently Amended): A process ~~Process~~ according to claim 12, wherein ~~characterised in that~~ the polymers in dispersion are selected from the group comprising polyacrylonitriles, polyacrylates, polyvinyl acetates and polystyrene-polyacrylate copolymers.

14. (Currently Amended): A process ~~Process~~ according to claim 12, wherein ~~or 13 characterised in that~~ the water-soluble binders are selected from the group comprising polyvinyl alcohols, ethylene-vinyl alcohol copolymers, polyvinyl butyrals, gelatin, galactomannans, alginates, carboxymethylcellulose and starches, including mixtures thereof.

15. (Currently Amended): A process ~~Process~~ according to claim 12, wherein ~~one of claims 12 to 14 characterised in that~~ the impregnation is carried out in a size press, film press or any other one of the known coating devices.

16. (Currently Amended): A process ~~Process~~ according to claim 12, wherein ~~one of claims 12 to 15 characterised in that~~ the sized raw paper is dried before impregnation to a dry matter content of 95 to 99%.
